### Abstract

This deliverable describes the goals, procedure and statistics of scouting activities for the 1st round of open calls.

The focus of this deliverable is on Local Robot Days for SMEs which are a main tool to promote the Open Call for SMEs and technology providers. Small adaptations with respect to the Grant Agreement have been necessary as the brokerage events were moved from European to local level. In this document a detailed guideline for the DIHs is given on how to organize and document Local Robot Days for SMEs. An up to date list of planned Local Robot Days for SMEs is available on the website <http://www.dih-squared.eu/>. However a list of the current status of these events is also included in this deliverable.

As more specialized deliverables exist for the Open Call itself and the Digital events, this report only describes the orchestration of all these events and provides references to them.

Concerning European Robot Days for SMEs the current state of planning is documented. No participation at large European Top-Events during the 1<sup>st</sup> stage of the 1<sup>st</sup> OpenCall is planned.
